

## Automatic Approval Settings

Last Modified on 2026-05-22

To set up an automatic approval rule for WSUS:

1. From the Windows Start menu, open **Windows Server Update Services** (wsus.msc) .
2. Navigate to **Options >Automatic Approvals**.

3. On the **Update Rules** tab, select the **Default Automatic Approval Rule** and click **Edit**.
4. In the **Edit Rule** window, under **Step 1: Select properties**, enable **When an update is in a specific classification**.
5. Under **Step 2: Edit the properties**, click on the link.

6. In the **Choose Update Classifications** window, ensure that the **Updates** classification is disabled.
