# Automatic Approval Settings

To set up an automatic approval rule for WSUS:

1. From the Windows Start menu, open **Windows Server Update Services** (wsus.msc) .

2. Navigate to **Options** >**Automatic Approvals**.

3. On the **Update Rules** tab, select the **Default Automatic Approval Rule** and click **Edit**.

4. In the **Edit Rule** window, under **Step 1: Select properties**, enable **When an update is in a specific classification** .

5. Under **Step 2: Edit the properties** , click on the link.

6. In the **Choose Update Classifications** window, ensure that the **Updates** classification is disabled.
