Update Application Manager for WSUS
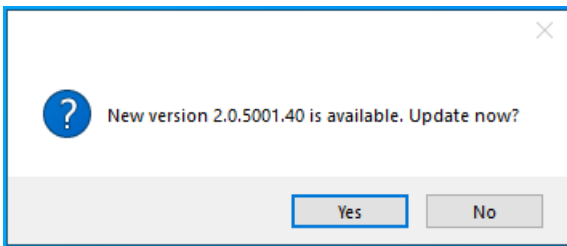

Updating Recast Application Manager is semi-automatic and it requires a few actions on the server where the application is installed. Follow these steps after Recast announces a new version release.

To update the Application Manager version:

1. Launch **Recast Application Manager**.

2. Click **Yes** when prompted to update the version.

3. Click **Start update** and confirm the update by clicking **Yes**.

4. After Application Manager updates, click **Exit**.

5. Launch **Application Manager** and update configurations by clicking **Yes**, if prompted.
