

# Privileged Access

Last Modified on 08.18.25

Privilege Manager, now called **Privileged Access**, is becoming a module within Right Click Tools Enterprise. All functionality remains the same, but expect product naming adjustments across Recast Help Center docs.

Manage access rights and give end users temporary self-service capabilities just when needed, all without compromising security.

## System Requirements

## Installation & Upgrades

- Install [Privileged Access](#)
- Upgrade your [Privileged Access Version](#)

## Configuration

- Complete your [initial setup](#)
- Set up [target groups](#), [group rules](#), [user rules](#), and [self-service rules](#)

## Agents

- [Retrieve a temporary password](#) or view the [Retrieved Passwords report](#)
- [Generate an activation code](#) or view the [Activation Codes report](#)
