

BitLocker Status

Last Modified on 07.29.24

The **BitLocker Status** tool provides detailed BitLocker information associated with selected devices.

To run the tool:

1. In your Configuration Manager console, right-click on a device or multi-select devices.
2. Click **Right Click Tools > Security Tools > BitLocker Status**.

The **BitLocker Status** window that opens displays details about the selected devices including:

- Drive Letter
- Disk Size
- Encryption Status, Method, and Percentage
- Conversion Status
- Lock Status
- Key Protectors (TPM, PIN, StartupKey, Passphrase, Numerical Password)

NOTE: Details are shown for all connected drives on a selected device.

Actionable Results

Additional Right Click Tools actions can be run from the BitLocker Status window by right-clicking on devices. BitLocker-specific actions include the ability to suspend or resume BitLocker, fully or partially decrypt or encrypt a volume, and add or back up key protectors.
