BitLocker Status

The **BitLocker Status** tool provides detailed BitLocker information associated with selected devices.

To run the tool:

1. In your Configuration Manager console, right-click on a device or multi-select devices.

2. Click **Right Click Tools** > **Security Tools** > **BitLocker Status**.

The **BitLocker Status** window that opens displays details about the selected devices including:

- Drive Letter

- Disk Size

- Encryption Status, Method, and Percentage

- Conversion Status

- Lock Status

- Key Protectors (TPM, PIN, StartupKey, Passphrase, Numerical Password)

Actionable Results

Additional Right Click Tools actions can be run from the BitLocker Status window by right-clicking on devices. BitLocker-specific actions include the ability to suspend or resume BitLocker, fully or partially decrypt or encrypt a volume, and add or back up key protectors.
