Upload Licenses to Recast Management Server

Licenses for all your Recast Software products and components are available from the [Recast Customer Portal](#). You can add your downloaded licenses to the **Licenses** page in your Recast Management Server.

Right Click Tools Patching and Privileged Access Licensing

With Patching and Privileged Access integrated into your Recast Management Server, you won't see either listed separately in the [Recast Customer Portal](#). For these Right Click Tools add-ons, downloading your Recast Management Server license from the portal and uploading it on the [Licenses](#) page will activate Patching and/or Privileged Access functionality in RMS.

To add Recast licenses to RMS:

1. Download or copy your Recast Software product and component licenses from the [Recast Customer Portal](#) by navigating to the [Downloads](#) page and clicking the [Download Licenses](#) button.
