

Create a Route

Last Modified on 05.08.26

To create a route:

1. On the RMS Routes page, click **Create**.

Routes

Routes determine where an action will be sent for execution. Drag and drop the routes to reorder them. They are priority based—the first route to successfully match is chosen.

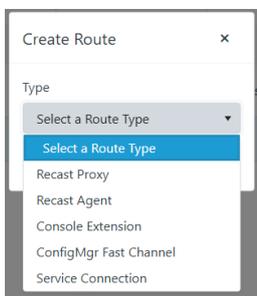

Note: Routes apply only to device actions.

[Create](#)

Route ID	Proxy Comp...	Proxy User...	Role	Scope ID	Route Type	Actions
1				1	Recast Agent	
25	DEV1-PROX-01	Proxy1	Administrators	1	Recast Proxy	
58	DEV1001	Proxy1	Administrators	1	Recast Proxy	
2				1	Console Extension	
3				1	Service Connection	
40	DEV1001	Proxy2	Administrators	39	ConfigMgr Fast Channel	
41	DEV1001	Proxy2	Administrators	40	ConfigMgr Fast Channel	

1 - 7 of 7 items

2. In the **Create Route** window, select the route **Type** (Recast Proxy, Recast Agent, Console Extension, ConfigMgr Fast Channel, or Service Connection). For details, see [Route Types](#).

Create Route

Type

Select a Route Type

Recast Proxy

Recast Agent

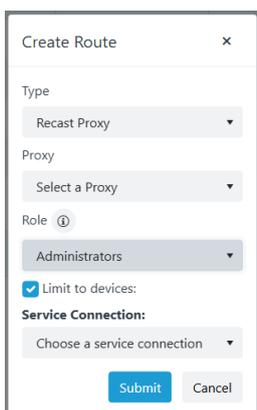

Console Extension

ConfigMgr Fast Channel

Service Connection

3. For a Recast Proxy or Fast Channel route:

- Select your proxy service account.
- Assign a **Role**, such as **Administrators**, that will determine the actions the proxy can run using this route.
- Add a [route limiting rule](#) by enabling the **Limit to devices** option and choosing a **Service Connection** and the device set to include. (optional, except for [Fast Channel routes](#))
