

Verify Actions Run Over Fast Channel

Last Modified on 12.01.25

To verify that actions are running over the fast channel, you can check the **Script Status** in the **Monitoring** section. If you can see that the Fast Channel Script you added is running successfully, it's working correctly.

The screenshot displays the 'Script Status' section within the 'Monitoring' tab. The interface includes a top navigation bar with 'Home', 'Saved Searches', 'Show Status', 'Refresh', and 'Properties'. Below this, a breadcrumb trail shows 'Monitoring > Overview > Script Status'. A left-hand navigation pane lists various monitoring categories, with 'Script Status' currently selected. The main area shows a table titled 'Script Status 325 items' with a search bar and columns for Client Operation ID, Script Name, Collection ID, Collection Name, Last Update Time, Overall Script Execution State, and Script Version. The table lists several 'Recast Fast Channel' scripts that have successfully executed, along with other scripts like 'Create Local Admin' and 'Test Script 4'.

Client Operation ID	Script Name	Collection ID	Collection Name	Last Update Time	Overall Script Execution State	Script Version
16777758	Recast Fast Channel			5/14/2020 9:33 AM	Succeeded	1
16777757	Recast Fast Channel			5/13/2020 3:44 PM	Succeeded	1
16777755	Recast Fast Channel			5/13/2020 12:14 PM	Succeeded	1
16777756	Recast Fast Channel			5/13/2020 12:14 PM	Succeeded	1
16777754	Recast Fast Channel			5/12/2020 8:27 PM	Succeeded	1
16777540	Create Local Admin			4/24/2020 9:55 AM	Succeeded	3
16777539	Create Local Admin			4/24/2020 9:34 AM	Succeeded	1
16777538	Create Local Admin			4/24/2020 9:33 AM	Succeeded	1
16777532	Test Script 4			4/21/2020 2:02 PM	Succeeded	6
16777525	Test Script 4			4/21/2020 2:02 PM	Succeeded	6
