

Authorize a Recast Agent

Last Modified on 02.01.23

Installed agents must be authorized before they can be used to [run actions](#). The Recast Management Server will automatically approve any agents that connect from the same domain as the Recast Management Server. Agents connecting from a different domain (or from a workgroup computer) must be approved manually, unless you've edited the default setting to approve all agents automatically.

Approve an Agent Manually

To approve an agent manually in RMS:

1. On the **Recast Agents** page, click the Edit icon to the right of the agent you want to authorize.
2. In the **Edit Recast Agent** window, enable the **Authorized** checkbox and click **Save**.

Approve All Agents Automatically

You can choose to have your Recast Management Server automatically authorize all agents regardless of the domain where they're installed.

To approve all agents automatically:

1. In your Recast Management Server, navigate to **Administration > Settings**.
 2. Under **Recast Management Server**, click the **Edit** icon to the right of **Recast Agent Approval**.
 3. In the **Change Setting** window, choose **Automatically Approve All Agents** from the **Value** drop-down.
