Delete a Recast Agent

Last Modified on 06.09.23

Deleting an agent on the **Recast Agents** page, removes it from the database and revokes the client certificate, but agent uninstallation must be done manually.

To delete an agent in RMS:

1. On the **Recast Agents** page, click the Delete icon to the right of the agent you want to remove.

2. In the **Delete Recast Agent** window, click **Delete**.
