

View Service Connections

Last Modified on 07.16.24

You can view connections between Recast Management Server and third-party products on the **Service Connections** page.

You'll find the page in RMS by navigating to **Administration > Service Connections**.

The **Service Connections** page displays the [type of connection](#) and whether it is **Confirmed** to be available for use. This is also where you can [add](#), [view/edit](#), [test](#) or [delete](#) a service connection.

Service Connections

Service connections allow Recast Management Server to request information from third-party services. [Learn More](#)

+ Add Service Connection
