

Restart on Idle

Last Modified on 07.07.23

Restart on Idle reboots the device if there has been no mouse or keyboard input for a specified number of minutes. This option can be enabled for the Autologin user or for all users. The default timeout is 30 minutes.

Options:

- **Do not restart on idle** (default)
- **Restart on idle for Autologin user**
- **Restart on idle for all users**

Kiosk Manager - Manage Profiles

Restart on Idle

Enable this if after X minutes of inactivity, you would like the computer to restart.

Do not restart on idle

Restart on idle for Autologin user

Timeout (minutes)

Restart on idle for all users

Timeout (minutes)
