

Apply a Kiosk Profile

Last Modified on 10.17.24

The Apply Profile dialog allows users to select an existing kiosk profile for deployment.

To apply a profile to a device:

1. In your Configuration Manager console, right-click on a device or device collection.
2. Navigate to **Kiosk Manager > Apply Profile**.
3. Select the profile to apply and click **Next**.
4. Choose to **Deploy Immediately** or to **Schedule Deployment**.
5. If you are scheduling the deployment, enter a **Task Name** and select a **Start Date** (required) then add an optional **End Date** or **Repeat Interval**.

Kiosk Manager - Apply Profile to 1 devices

Apply Profile

Choose the schedule with which to apply the profile. Note that devices will reboot once the profile is applied.

Deploy Immediately

Schedule Deployment

Start Date*

Task Name*

End Date

Repeat Interval (dd.hh:mm:ss)

NOTE: Scheduled actions require [Recast Management Server with Recast Proxy](#).

6. Click **Finish**.

When [Recast Agents](#) are deployed to devices with a kiosk profile, the Agent automatically downloads all Recast licenses from your Recast Management Server, including licenses specific to Kiosk Manager. Using Recast Agents bypasses the need to reapply kiosk profiles to all devices upon license renewal.
