Recast

# View Scheduled Task Results

Last Modified on 2026-07-22

> As of Right Click Tools v5.12.2607, the Scheduled Tasks tool is no longer available. New visibility into scheduled tasks for kiosks will be added to a future release. In the meantime, we suggest using the Applied Profile Status tool for information about profiles applied to devices or a device collection.

The Scheduled Tasks Results Tool shows the status (**Success** or **Failed**) of each previously applied kiosk profile.

To view scheduled tasks results:

1. In your Configuration Manager console, right-click on a device or device collection.

2. Navigate to **Kiosk Manager** > **Scheduled Task Results**.
