

Recast Software Version 5.0.2302.2202

Last Modified on 07.10.23

Release Date: February 22, 2023

Upgrade to the newest bug fix release by downloading Version 5.0.2302.2202 from the [Recast Portal](#).

For instructions on upgrading your software version, see [Upgrade Right Click Tools](#) and [Upgrade Endpoint Insights](#).

Bug Fixes

Recast Management Server

- Fixes issues where the installation wizard would end prematurely with error (-2147024885) or (-532462766).

Trend Graphs

- Fixes an issue where x-axis labels displayed incorrectly.
- Fixes an issue with data trending at 100% or 0% being cut off the graph.
- Fixes missing input parameters in audit log results.
- Fixes an error when expanding a dashboard quadrant to full screen view.
- Fixes an 'item with the same key has already been added' error.

Right Click Tools

- Fixes an issue where the Configure Recast application would not open from the Right Click Tools node.
- Fixes Enterprise licenses displaying as Community licenses.
- Fixes an issue where selecting multiple devices in the console would open multiple windows for just the first device selected.
- Software Updates Deployment Status console dashboard: Fixes issues where the snapshot icon did not display and snapshots were not created in Recast Management Server.

Endpoint Insights

- Battery-related reports: Fixes an issue on where devices with no battery were not displayed.
 - List of Computers by Battery Health: Fixes a 'Divide by zero' error when opening the report.
 - Locate Computers by Username: Fixes the SQL query.
 - TLS-related reports: Adds missing protocol settings.
 - Fixes an issue where virtual monitors were not displayed as 'Active'.
 - Fixes an issue where WMI class returned no results.
-
