

RECAST SOFTWARE

Install a Recast Proxy

Last Modified on 02.25.25

A service account proxy can be installed on the same server as the Recast Management Server, either [during](#) or [after](#) Recast Management Server installation.

If the proxy is being installed in a different domain than the Recast Management Server, the Recast Proxy must be deployed separately after [Recast Management Server installation](#). See [Install Recast Proxy Separately](#).
