Installation Workflow for Right Click Tools with RMS

Last Modified on 2026-07-22

By implementing Right Click Tools Enterprise with Recast Management Server, you'll have access to the product's full functionality. Before downloading and installing Right Click Tools, make sure that the system requirements for its implementation are met.

Implementation Approaches

If you have yet to fully set up your RMS infrastructure Install the console extension (Task 1) initially and then install and configure your Recast Management Server (Tasks 2–4) at a later date.

If all the prerequisites for RMS are in place: Skip Task 1 and install Recast Management Server with Recast Proxy (Task 2) followed by Right Click Tools with Recast Management Server.

If you've already installed your Recast Management Server and Recast Proxy: Skip Task 1 & 2 and deploy the Right Click Tools Console Extension via RCT Patching and/or ConfigMgr.

If you're installing Right Click Tools along with Insights and Patching Follow our Essentials Bundle Implementation Guide.
