

Recast Software Version 5.1.2303.1708

Last Modified on 09.08.23

Release Date: April 5, 2023

Version 5.1.2303.1708 includes feature updates, usability improvements, and bug fixes. For instructions on updating your software version, see our articles on upgrading [Right Click Tools](#) and [Privilege Manager](#).

PLEASE NOTE: We recommend that our Endpoint Insights customers skip Version 5.1.2303.1708 and update their systems to [Version 5.1.2304.1704](#).

Features

Shift Left

Support for ServiceNow Update: Shift Left now supports the Tokyo release of ServiceNow.

Right Click Tools with Recast Management Server

Web Dashboards: New toast notifications make it clear when a Right Click Tools dashboard snapshot or trend is being created and when it is ready.

Application Manager

The [Application Manager catalog](#) is expanding! See [Recently Added Software](#) for a list of **51 new applications** you can now deploy using Application Manager.

Bug Fixes

Right Click Tools

- Fixes an issue where task sequences and packages wouldn't run from Remote Software Center.
- Fixes an issue where successfully installed packages were showing as uninstalled.

Recast Management Server

- **Trends Dashboard**
 - Fixes data point mismatches between quadrant and expanded views.
 - Removes an extra, unexpected line that appeared in some quadrant views.

Privilege Manager

- Fixes an issue with the 'Add local group' side panel reopening in error.
- Fixes an issue where default configuration setup could continue without a required group rule.

Recast Components

- Replaces missing analytics for Recast Agent and Recast Proxy starts.
-
