Select AM Applications

You can select applications for your Application Manager service from the AM Portal located at https://am.recastsoftware.com.

To select applications:

1. In the Application Manager Portal, navigate to **Services** > **Application Manager for Intune** / **WSUS** / **MECM** > **Administration** > **Service Applications**.

2. Select applications from the list and save your changes.

> **NOTE**: Only select applications are available during an Application Manager trial. See the list of Supported Applications.

Once you've selected applications, you can add them to deployment processes.

- Application Manager for MECM
- Application Manager for Intune
