

## Recast Agent Logs

Last Modified on 12.02.25

A [Recast Agent](#) is used to collect inventory data for Right Click Tools Insights.

There are two types of Recast Agent logs for Insights: **Client Installation** and **Client Operation**. Should our Support Team ask you to send Recast Agent logs to assist with troubleshooting Insights, here's where to find them and how to send them to us.

### Agent Log Location

**C:\ProgramData\Recast Software\Logs**

### Client Installation

If a Recast Agent was installed using the Configuration Manager Application created during Insights setup, the client installation log will be located in the %temp% folder, which is typically found at **C:\Windows\Temp**.

If you deploy a Recast Agent in another manner, logging is not enabled by default. In this case, use the normal MSI logging switches to enable Recast Agent client setup logging. The recommended settings are **/L\*V %temp%\RecastAgentMSI.log**.

Log Name	Description
RecastAgentMSI<version number>.log	Provides details about the MSI installation.

### Client Operation

For RecastAgent\_Computer.log, RecastAgent\_Monitor.log, and RecastAgent\_User.log, this will always be the active log.

For RecastAgent\_xxx.log, the log file with the highest version number will be the active log for Recast Agent.

Log Name	Description
RecastAgent_Computer.log	<ul style="list-style-type: none"><li>Main Insights inventory log file.</li></ul>
RecastAgent_Monitor.log	<ul style="list-style-type: none"><li>Details about computer monitor inventory, such as how it is connected.</li></ul>
RecastAgent_User.log	<ul style="list-style-type: none"><li>Details about user inventory, such as ARP data for a user.</li></ul>
RecastAgent_xxx.log	<ul style="list-style-type: none"><li>Details about the Recast Agent service itself.</li></ul>

To send Recast Agent logs to Recast Support:

1. In the **Logs** folder, select all Agent logs showing more than 0 KB.
2. Right-click and add the selected logs to a new Compressed (Zipped) File.
3. Send the file to our [Support Team](#).

**NOTE:** You can also use the [El Support Tool](#) to collect all Insights logs into a single .zip file.
