System Information Overview

The **System Information** tool displays a variety of system information and allows several right click actions. This tool offers data in the following categories: Operating System, Hardware, Applications, Windows Updates, Services, Drivers, User Profiles, User Sessions, Local Group Members, Batteries.

This action can be run on single and multi-selected devices, or with a similar tool designed for device collections .

NOTE: When running System Information against multiple devices or a collection, each of the devices will be represented in the results and can be multi-selected.

To run the tool:

1. In your Configuration Manager console, right-click on a device.

2. Click **Right Click Tools** > **Console Tools** > **System Information**.
