

Applications

Last Modified on 08.02.23

The **System Information - Applications** tab displays details including application Name, Publisher, Architecture, Version number, Uninstall String, and Devices.

NOTE: Uninstall strings are pulled via the Remote Registry service and added during Right Click Tools installation.

Clicking an application select box reveals the option to uninstall the application.

The screenshot shows the 'Applications' tab in the Recast Software interface. The left sidebar contains navigation options: Operating Systems, Hardware, Applications (selected), Windows Updates, Services, Drivers, User Profiles, User Sessions, Local Group Members, and Batteries. The main area displays a table of installed applications. Each row includes a select box, the application name, publisher, architecture, version, uninstall string, and devices. A 'Refresh' button and an 'Uninstall' button are visible at the top right of the table. The bottom status bar shows '0 Errors'.
