

Services

Last Modified on 08.02.23

The **System Information - Services** tab displays the Status and Startup Type of each service for a device.

Clicking on a service opens options to start, stop, or restart the service and specify the Startup Type for the service.

The screenshot shows a web-based interface for managing services. On the left is a navigation sidebar with categories: Operating Systems, Hardware, Applications, Windows Updates, Services (highlighted), Drivers, User Profiles, Local Group Members, and Batteries. The main area displays a table of services. At the top right of the main area are buttons for 'Refresh', 'Start Service', and 'Start Automatic'. The table has columns for 'Display Name', 'Name', 'Status', 'Startup Type', and 'Devices'. A tooltip is visible over the 'Name' column of the first service, showing 'Name', 'Status', and 'Startup Type' headers. The 'RECAST-DEMO-2.RECASTSOFTWARE.LOCAL' service is highlighted in blue. At the bottom left is the 'RECAST SOFTWARE' logo, and at the bottom right is a '0 Errors' indicator.

Display Name	Name	Status	Startup Type	Devices
Microsoft Monitoring Agent Audit Forwarding AdtAgent				1
Sends events to a collector for storage in a SQL database.				
	RECAST-DEMO-2.RECASTSOFTWARE.LOCAL	Stopped	Disabled	
Alloyn Router Service	AIRouter			1
