

# User Sessions

Last Modified on 08.02.23

The **System Information - User Sessions** tab shows details about the user sessions on the device, including the connection status and the duration.

Clicking on a user session reveals the option to log off the selected user session.

| Username                 | Domain | Devices |   |
|--------------------------|--------|---------|---|
| <input type="checkbox"/> | martym | DEV     | 1 |

  

| Name  | Status       | Connected Fro | Logged On | Idle  | Disconnected | Session Name |
