

Local Group Members

Last Modified on 08.02.23

The **System Information - Local Group Members** tab shows the Group Name, Member Domain and Member Name for each Local Group.

Selecting a Group or Group Member displays the option to delete the group or group member.

The screenshot displays the 'Local Group Members' interface. On the left is a navigation pane with categories: Operating Systems, Hardware, Applications, Windows Updates, Services, Drivers, User Profiles, Local Group Members (selected), and Batteries. The main area shows a list of local groups with expandable details. The 'Guests' group is expanded, showing a table of its members.

Group Name	Members
Administrators	4
Guests	1
IIS_IUSRS	1
Remote Desktop Users	1
System Managed Accounts Group	1
Users	3
ConfigMgr Remote Control Users	1

Member Name	Devices
Guest	1

Computer Name	Member Domain	Member Name	Group Name
RECAST-DEMO-2.RECASTSOFTWARE.LOCAL	RECAST-DEMO-2	Guest	Guests

Buttons: Refresh, Remove. Bottom right: 0 Errors.
