

Client Information Overview

Last Modified on 01.23.26

The **Client Information** tool provides several types of information and available actions for the ConfigMgr client.

This tool completes the lookup of this data via [Remote WMI](#), [Remote SMB](#), [Remote Registry](#), and [Filesystem](#).

For a video short, see [Client Information Tool](#) on our YouTube channel.

To run this tool:

1. In your Configuration Manager console, right-click on a device.
2. Click **Right Click Tools > Client Tools > Client Information**.
