# Client Information Overview

Last Modified on 04.23.24

The **Client Information** tool provides several types of information and available actions for the ConfigMgr client.

This tool completes the lookup of this data via [Remote WMI](#), Remote SMB, [Remote Registry](#), and Filesystem.

To run this tool:

1. In your Configuration Manager console, right-click on a device.
2. Click **Right Click Tools > Client Tools > Client Information**.

Looking to learn more about typical Client Information scenarios?
