

Cache

Last Modified on 07.31.23

The **Client Information - Cache** tab shows general information about the cache, such as Path, Size, and Used Space.

Clicking on the cache select box allows you to clear the cache or change the cache size.

The screenshot displays the 'Cache' tab in a management console. On the left is a navigation menu with options: General, Components, Cache (selected), Cache Details, Applications, Execution History, and Boundaries. The main area shows a table with the following data:

Name	Used Cache Space	Available Cache Space	Percent Cache Used
RECAST-RCTPRD.RECASTSOFTWARE.LOCAL	10513	-273	103

At the top right of the main area are buttons for 'Refresh', 'Clear Cache', and 'Change Cache Size(MB)' with a value of '10240'. Below the table, there is a large grey rectangular area. In the bottom right corner, it says '0 Errors'.
