

Right Click Tools Roles

Last Modified on 05.09.25

Right Click Tools with Recast Management Server lets you set up role-based permissions that use Active Directory users or groups to grant or limit access to specific actions.

Assign a Right Click Tools Role

You can grant a user or user group Recast permissions by assigning a specific role, such as an Administrator role. Your Recast software must be connected to Recast Management Server to set up role-based permissions.

ROLE NOTES:

- When a user is assigned multiple roles, their permissions for each role are aggregated
- A user's role is also constrained by any [user or group limiting rules](#) that are applied

Add an Active Directory User or User Group

To add an AD user or user group:

1. In your Recast Management Server, navigate to **Administration > Permissions**.
2. In the Recast Users section, click **Add User** or **Add Group**.

Recast Users

				Add User	Add Group
Name	Identifier	Is Group	Actions		
Administrators	0-1-0-01-00000000-00000000-00000000-0000	True	Edit Delete		
Low Permission User	0-1-0-01-00000000-00000000-00000000-0000	False	Edit Delete		

3. In the window that opens, search for your AD name or AD user group and click the **Add** button.

NOTE: You can include a **wildcard (*)** to facilitate your search.

Wildcard examples:

- **John Connor** returns strings that match exactly
- **John C*** returns strings beginning with 'John C', such as '**John Connor**', '**John Connors**', and '**John Cranston**'
- ***Connor** returns strings ending with 'Connor', such as 'John **Connor**' and 'Carol O'**Connor**'

- **Read Only** - This security role grants users read access to all of the Right Click Tools and [web dashboards](#). This includes the Endpoint Insights Report Viewer role.

For the complete list of permissions granted with this role, see [Read-Only Analyst Role Permissions](#).

- **Remote Software Center** - This security role grants users access to all the actions within the Right Click Tools [Remote Software Center](#).

For the complete list of permissions granted with this role, see [Remote Software Center Role Permissions](#).

- **Content Distribution Monitor Dashboard** - This security role grants users access to all the actions within the Right Click Tools [Content Distribution Monitor](#) (for Configuration Manager).

For the complete list of permissions granted with this role, see [Content Distribution Monitor Dashboard Role Permissions](#).

Recast Roles

		Create
Name	Actions	
Administrators	Rename Permissions Delete	
Read Site	Rename Permissions Delete	
LAPS	Rename Permissions Delete	
Read Only	Rename Permissions Delete	
Remote Software Center	Rename Permissions Delete	
Content Distribution Monitor Dashboard	Rename Permissions Delete	
User	Rename Permissions Delete	

TIP: You can view or edit the permissions granted by a role by clicking **Permissions**.

To assign a custom role to a user or user group:

1. On the **Permissions** page, click the Edit icon to the right of a user/user group.
2. Under **Role Assignments**, select **Read Only**, **Remote Software Center**, or **Content Distribution Monitor Dashboard**.
3. Under **Assigned Roles**, enable **Limit this user to specific objects** and select a **Service Connection** to add a limiting rule that restricts user permissions to a set of devices (optional). To learn more, see [Limiting Rules](#).
4. Click **Save**.
