

## Right Click Tools System Requirements

Last Modified on 2026-05-29

The following requirements must be met to install Right Click Tools with Recast Management Server.

You'll need just the console extension system requirements and permissions to install Right Click Tools Community or Right Click Tools Enterprise in Standalone mode.

## Console Extension System Requirements & Permissions

### Software

- **Microsoft Configuration Manager:** Supported versions
- **Operating System:** Microsoft-supported versions of Windows 10 and later

### Permissions

- The user running the action in the Configuration Manager console must have Local Administrator permissions on the target device.

**NOTE:** If Local Admin access to devices is not allowed for certain users, you'll need to install Right Click Tools with Recast Management Server and use either a Recast Proxy or a Recast Agent to run actions. For more information, see [Access Denied](#).

## Recast Management Server Requirements

Before installing Recast Management Server, ensure that your system meets the following [hardware](#), [software](#), [network](#), and [certificate](#) requirements.

For a breakdown of permissions you must grant to a Recast Proxy for each product, see [Proxy Permissions](#).

### Hardware

The Recast Management Server hardware requirements listed in this document are meant to guide the setup of a simple Recast environment for all Recast Software products that connect to Recast Management Server. These guidelines assume that all default settings are used, that the server has Internet access, and that your environment includes fewer than 20K Agents. For larger or more complex environments, refer to the [comprehensive list of RMS System Requirements](#).

Physical or virtual server (on-premises or cloud) sized as follows:

- 8-core CPU
- 28 GB RAM
- 2 GB of Disk Space on the C: drive

**NOTE:** Additional disk space required for the Recast Management Server database or for Right Click Tools Patching does not need to be located on the C: drive.

### Software

# Recast

For Recast Management Server	Supported version of Microsoft Windows Server (Windows Server 2022 recommended) Microsoft .NET Framework Version 8 Supported version of Microsoft SQL Server Standard (SQL Server Standard 2022 recommended)
For Right Click Tools Console Extension	Supported version of Microsoft Configuration Manager Supported version of Windows 10 or later
For Right Click Tools Patching	Supported version of Microsoft Configuration Manager
For Right Click Tools Insights	Supported version of SQL Server Reporting Services Power BI Report Server September 2022 version or later

## Network Requirements

### Inbound Network Traffic

The default network port for inbound network traffic to the Recast Management Server is TCP/444.

### External Domains

Recast Management Server requires outbound access to the following external domains.

For Recast license activation	<a href="https://activation.recastsoftware.com">https://activation.recastsoftware.com</a>
For Right Click Tools Insights warranty information collection	One-way from RMS to the API at <a href="https://warranty.recastsoftware.com">https://warranty.recastsoftware.com</a> (TCP/443)
For Right Click Tools Patching Enterprise	<a href="https://amprod02.recastsoftware.com">https://amprod02.recastsoftware.com</a> (TCP/443) – to access the application catalog <a href="https://amprodpub02.recastsoftware.com">https://amprodpub02.recastsoftware.com</a> (TCP/443) – to download application media and icons
For Right Click Tools Patching Standard	<a href="https://amprod01.recastsoftware.com">https://amprod01.recastsoftware.com</a> (TCP/443) – to access the application catalog <a href="https://amprodpub01.recastsoftware.com">https://amprodpub01.recastsoftware.com</a> (TCP/443) – to download application media and icons
For Intune integrations in Right Click Tools Patching	<a href="https://login.microsoftonline.com">https://login.microsoftonline.com</a> (TCP/443) – for Entra ID authentication <a href="https://graph.microsoft.com">https://graph.microsoft.com</a> (TCP/443) – to connect to the Microsoft Graph REST API

## Certificate Requirements

Recast Software strongly recommends using public certificates or Active Directory certificates (AD CS).

The certificate's subject name (or a subject alternative name) should match the server name in the URL to which Right Click Tools and/or Recast Proxies are pointed.
