Application Manager Legacy User Roles

Last Modified on 11.20.25

In the Application Manager Legacy Portal, users can be granted role-based permissions.

Admin role

The Admin role has permission to do everything on the selected customer but cannot manage the AM portal configuration (i.e. this role has no **PortalAdministrator.*** permissions).

User role

The User role has permissions set to **Yes** for the following:

- Services.SoftwareManager
- Services.SoftwareManager.Applications
- Services.SoftwareManager.Applications.ServiceApplications
- Services.SoftwareManager.IntuneMDM

NOTE: The User Manager role currently has no permissions assigned.
