Upload Licenses to Recast Management Server

Last Modified on 07.09.24

Licenses for all your Recast Software products and components are available from the Recast Portal. Downloaded licenses can then be added to the **Licenses** page in your Recast Management Server.

As Application Manager and Privilege Manager are integrated into your Recast Management Server, you won't see Application Manager or Privilege Manager listed separately in the Recast Portal.

For these Recast products, downloading your Recast Management Server license from the portal and uploading it on the **Licenses** page will activate Application Manager and/or Privilege Manager functionality in RMS.

To add Recast licenses to RMS:

1. Download or copy your Recast Software product and component licenses from the Recast Portal by clicking on the cloud icon under Actions.

Name	Subscription Type	Version	Description	Upload Date	License Timeframe	Subscription Limits	Actions
Right Click Tools	Right Click Tools	5.3.2311.103	Client install of Enterprise Right Click Tools (stand alone or w/ Recast Management Server).	Nov 1 2023	Aug 2 2021 to 2025-09-02	2 devices	⬇☁🗒

NOTE: All of your Recast Software licenses are consolidated in a single license file, meaning that you can click on the cloud icon in any row to download licenses.

2. In your Recast Management Server interface, navigate to **Administration** > **Licenses**.

3. Click **Upload** and select licenses.
