Deployment Type

Last Modified on 03.25.25

You can view or edit deployment types available for Configuration Manager on the **Environment Settings** page by clicking the **Deployments** and **Basic** tabs.

Available options:

- **Required** - Application installation will be forced

- **Available** - Users can choose to install the application from Software Center

- **Available with forced upgrade** - Users can choose to install the application from Software Center. If, however, a superceded version of the application is found, the system will force the upgrade.
