

View Patching Administrator Permissions

Last Modified on 08.18.25

You can view the full set of permissions granted to users assigned an Administrator role for Right Click Tools Patching.

To view admin role permissions:

1. On the RMS **Permissions** page, under Recast Roles, click **Permissions** to the right of the Administrators role.

Recast Roles

		Create
Name	Actions	
Administrators	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	
Read Site	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	
LAPS	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	
Read Only	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	
Remote Software Center	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	
Content Distribution Monitor Dashboard	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	
User	<button>Rename</button> <button>Permissions</button> <button>Delete</button>	

2. In the **Role Permissions** window, expand the **Patching** (previously ApplicationManager) section.
