Last Modified on 09.08.25

The Patching **Deployment Processes** page displays information about all your deployment processes. From this page, you can [add a new deployment process](#) and pause or delete deployment processes.

Deployment process information:

- **Environment:** Displays the Configuration Manager or Intune environment targeted by the deployment process.
- **Applications:** Number of applications in the deployment process. Click the number to [view and manage the applications](#) in the deployment process.
- **Date Processed**
- **Status** of the deployment process:
 - **Successful** - The application was imported successfully to MECM.
 - **Running** - The application import is in progress.
 - **Pending run** - A new deployment process that has not started. To start the deployment process, click the ellipsis (...) in the Actions column and click **Run**.
 - **Paused** - The deployment process is temporarily stopped and Patching won't import new versions of the selected applications.
 - **Warning** - The application was imported into Configuration Manager, but Patching wasn't able to create all the specified deployments. Make sure any specified collections/group are set up.
 - **Error** - The application import failed and requires [troubleshooting](#).
- **Total Process Time:** The number of days from the start of the first deployment step to the end of the last deployment step.
- **Actions**
 - **View Details** including the applications included, the total duration, the list of deployment steps, and any delays.
 - Click the ellipsis (...) to **Run**, **Pause** or **Delete** the deployment process. Select **Manage Settings** to modify all deployment process related settings.
