

View the Application Manager Catalog

Last Modified on 05.15.24

The **Applications** page in your Recast Management Server interface displays Application Manager's entire catalog. The applications available for you to deploy are determined by your Application Manager licensing. For more information, see [Application Manager Catalog](#).

Application details include:

- **Vendor**
- **Application name**
- **Date Added:** Sorted by most recent release date by default
- **Deployment Processes** that include the application
- **Version Currently Installed** (This information will be available in a forthcoming release)
- **Version to be Deployed**
- **Actions:** [Deploy an application immediately](#) or [remove an application from a deployment process](#)
