RECAST SOFTWARE

View the Application Catalog

Last Modified on 08.18.25

The Recast Management Server **Applications** page displays the entire Patching catalog, as well as any custom applications you add. While all Recast customers with access to RMS can view the full catalog, the number of software applications available for deployment depend on your Recast licensing. Migrating from an existing Application Manager Legacy account to Right Click Tools Patching (previously Application Manager with Recast Management Server) offers you an opportunity to upgrade to the Enterprise package and access **over 5000 applications**. Learn about other differences between Right Click Tools Patching and Application Manager Legacy.

The **Recast Catalog** tab displays AM-supported applications. The **My Catalog** tab lists your custom applications.
