

Delete a Deployment Process

Last Modified on 09.18.25

When you delete a deployment process, the applications included in it are no longer updated as new versions become available.

NOTE: These steps remove the deployment process from Right Click Tools Patching. To completely remove the applications, you'll also need to delete the deployments and the applications in your Configuration Manager console or in Intune.

To delete a deployment process:

1. On the Patching **Deployment Processes** page, click the horizontal ellipsis (...) next to the deployment process to delete.
2. Select **Delete** from the drop-down and confirm the deletion. This action cannot be undone.

To delete an individual deployment step:

1. On the **Deployment Process Details** page, click the ellipsis (...) to the right of a deployment step.

2. Select **Delete Collection** from the drop-down and confirm the deletion.

PLEASE NOTE: When deleting a deployment step, there is currently no confirmation dialog. An upcoming Patching release will add a chance to confirm the action.
