

## Delete a Deployment Process

Last Modified on 11.21.25

When you delete a deployment process, the applications included in it are no longer updated as new versions become available.

**NOTE:** These steps remove the deployment process from Right Click Tools Patching. To completely remove the applications, you'll also need to delete the deployments and the applications in your Configuration Manager console or in Intune.

To delete a deployment process:

1. On the Patching **Deployment Processes** page, click the horizontal ellipsis (...) next to the deployment process to delete.
2. Select **Delete** from the drop-down and confirm the deletion. This action cannot be undone.

### Deployment Processes

The screenshot shows the 'Deployment Processes' interface. At the top right is a button '+ Add Deployment Process'. Below it is a search bar and a refresh icon. The main table has columns: Deployment Process, Environment, Applications, Date Processed, Status, Total Process Time, and Actions. One row is visible for 'Recast Software Recast Agent (English) (x64)' in the 'dev-environment' with 1 application, processed on 3/26/2025, with a 'Successful' status and '0 Days' total process time. An action menu is open for this row, showing 'Run', 'Pause', 'Manage Settings', and 'Delete'.

**TIP:** You can also delete a deployment process from the **Deployment Process Details** page by clicking the vertical ellipsis, selecting **Delete Deployment Process**, and confirming the deletion.

The screenshot shows the 'Deployment Process Details' for 'Recast Software Recast Agent (English) (x64)'. It indicates '1 environment | 1 application' and a 'Successful' status with a 'Run' button. Below, it shows '1 application' and '1 Deployment'. A table lists the deployment process 'Recast Software Recast Agent (English) (x64)' with a duration of 'Total: 0 Days' and a release date of '+1 Days' to '+2 Days'. A dropdown menu is open for the deployment step, showing 'Reimport Applications' and 'Delete Deployment Process'.

To delete an individual deployment step:

1. On the **Deployment Process Details** page, click the ellipsis (...) to the right of a deployment step.
2. Select **Delete Deployment Step** from the drop-down and confirm the deletion.
