Recast Software Version 5.5.2404.1007

Last Modified on 2026-10-29

Release Date: April 10, 2024

Version 5.5.2404.1007 includes new features and bug fixes. Upgrade to this Recast Software release by downloading it from the Recast Portal. For instructions on updating to this version, see our articles on upgrading Right Click Tools, Endpoint Insights, Privilege Manager, and Application Manager.

PLEASE NOTE: **We recommend that all Recast Software customers using Recast Agents skip Version 5.5.2404.1007 and update their systems to Version 5.5.2406.1703.**

Features

Right Click Tools

Retrieve BitLocker Recovery Keys from Configuration Manager

With our new Right Click Tool, you can now view and copy BitLocker keys stored in ConfigMgr.

BitLocker Compliance Web Dashboard Updates

We've introduced some improvements to the BitLocker dashboard in your Recast Management Server.

- Decluttered charts and legends only display categories that include at least one device
- The table's new Key Storage column displays recovery key storage locations
- For greater accuracy, the count at the top of each tab displays the number of devices rather than a percentage of devices

Content Distribution Monitor Improvements

It's now easier to view and sort a large number of distribution points on the Content Distribution Monitor dashboard.

- Distribution point bar charts sort alphabetically
- Individual bar chart rows no longer resize
- A scroll bar lets you see distribution points that extend beyond the viewable area

Application Manager

Reimport Applications

You can now reimport an application version in Configuration Manager without waiting for a new version to be published in the Application Manager catalog.

Bug Fixes

Recast Management Server

Recast Agent

- Adds missing Agent versions after upgrading from Recast Software v5.3.2311 to v5.3.2312. (Customer-Reported Bug 13151)

- Fixes an issue where the Recast Agent service incorrectly established multiple connections to the Agent Gateway.

Endpoint Insights

TLS Reports: Fixes an incorrect TLS version in charts when drilling down to the list report.

List of Computers by BitLocker and TPM Status: Fixes alphabetical sorting by computer name.

End-of-Life Announcements

With this release, Recast Software retires Shift Left.
