RECAST SOFTWARE

500.31 IIS Error

Last Modified on 04.12.24

Error Message: HTTP Error 500.31 - Failed to load ASP.NET Core runtime.

This error may be caused by a version mismatch between .NET Core components.

To troubleshoot this error, check that your .NET Windows Core Hosting Bundle version and ASP.NET Core version match.

If the .NET Windows Core Hosting Bundle version and the ASP.NET Core version do not match, downgrade or upgrade one of the components so that they are running the same version.
