

## Reimport Applications

Last Modified on 11.21.25

You can reimport applications from either the Applications page or the Deployment Process Details page.

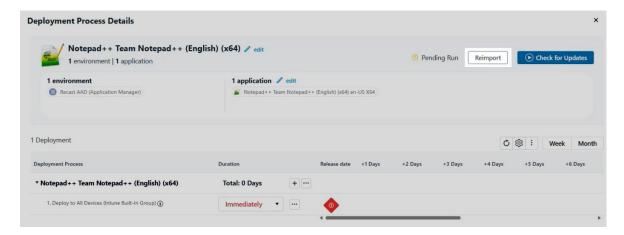

## Initiate a reimport on the Applications page

On the Applications page, click the Deploy button to the right of the application to reimport.

## **Applications** Q Microsoft Vendor Date Added **③** ↓ Application Deployment processes Version to be Deployed Actions Microsoft Visual Studio 2022 3/26/2025 Microsoft v17.13.35919.96 □ Deploy Microsoft Visual Studio 2022 3/26/2025 od Microsoft v17.13.35919.96 ₽ Deploy ··· ₽ Deploy ··· Microsoft Windows Defender Antivirus 3/26/2025 v1.425.250.0

## Initiate a reimport on the Deployment Process Details page

1. On the Deployment Process Details page, click the Reimport button.

TIP: You can also find the Reimport Applications option by clicking the vertical ellipsis to the right of the Settings cog.

- 2. In the Reimport Application side panel that opens, choose whether to redownload the application version from the Applications Catalog.
- 3. Click Reimport Application(s).
