

Application Management Tools

Last Modified on 2026-05-28

All Status Messages

The **All Status Messages** tool lets you view status messages in 24 different Configuration Manager console locations. The status messages displayed are context-specific, depending on where the tool is opened.

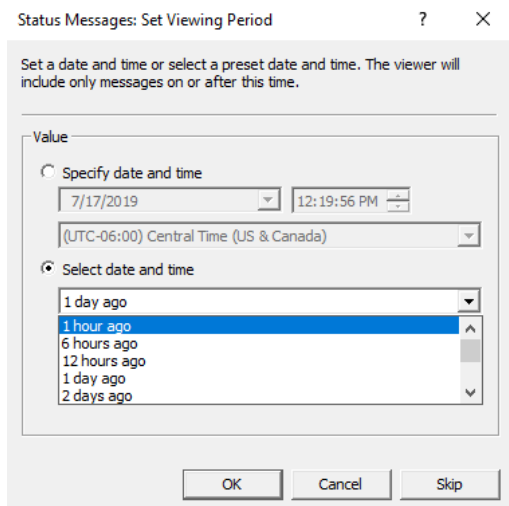

Administrative User	Application	Application Node
Boot Image	Client Settings	Collection
Content	Deployment	Device
Devices Node	Distribution Point	Driver Package
Image Package	OS Images Node	OS Install Package
Package	Package Node	Software Update Group
Software Update Package	Software Updates Node	User
User Collection	User Discovery	Users Node

Permissions

Plugin	Permissions
ConfigMgrServer	GetStatusMessageQueries
	RunStatusMessageQuery
LocalActions	StatusMessages

To view all status messages:

1. Right-click on any of the available console locations.
2. Click **Right Click Tools > All Status Messages**.
3. In the Status Messages window that opens, set a viewing period by choosing a date and time or selecting a preset date and time.

Recast

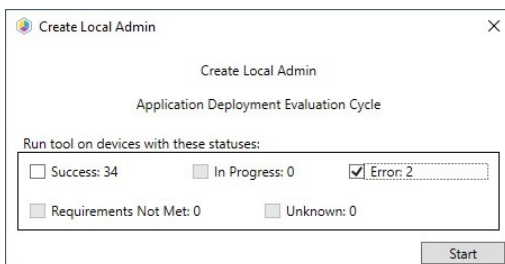

Status messages are displayed for the selected period. The list can be searched, sorted, filtered, exported, and saved.

Deployment Launcher

The **Deployment Launcher** lets you run Right Click Tools against devices in a particular deployment state. It can be used to force devices in an error state to rerun deployment, update policies, or add devices to a collection.

To run the Deployment Launcher:

1. In your Configuration Manager console, navigate to **Software Library > Overview > Application Management**.
2. Open **Applications, Packages** or **Software Updates**, depending on the type of deployment.
3. Select the **Deployments** tab at the bottom of the page.
4. Right-click on a deployment, then click **Right Click Tools > Client Actions on Deployment**.
5. Select a Right Click Tools action.
6. Select a status or statuses to run the action against.

Plugin	Permissions
LocalActions	DeploymentLauncher

Application Revision History

The **Application Revision History** tool lets you view previous versions of an application.

To run the tool:

1. In your Configuration Manager console, navigate to **Software Library > Overview > Application Management > Applications**.
3. Right-click on an application, then click **Right Click Tools > Application Revision History**.

Recast
