Recast Software Version 5.5.2405.1503

Last Modified on 2026-10-29

Release Date: May 15, 2024

Version 5.5.2405.1503 includes new features and bug fixes. Upgrade to this Recast Software release by downloading it from the Recast Portal. For instructions on updating to this version, see our articles on upgrading Right Click Tools, Endpoint Insights, Privilege Manager, and Application Manager.

PLEASE NOTE: **We recommend that all Recast Software customers using Recast Agents skip Version 5.5.2405.1503 and update their systems to Version 5.5.2406.1703.**

Features

Privilege Manager

Run Actions From Configuration Manager Console Extensions

You can now run Privilege Manager's Retrieve Local Account Password and Generate Activation Code actions directly from your Configuration Manager console.

Application Manager

Automatic Application Cleanup

You can now enable cleanup features for old application versions. In addition to basic cleanup functionality, you can choose to retire and/or remove previous application versions automatically from Configuration Manager when the deployment of a newer version begins.

Remove an Application from a Deployment Process

On the **Applications** page, we've added the ability to remove an application from an existing deployment process.

Bug Fixes

Recast Management Server

Routes: Corrects the prioritization of newly created routes.

Right Click Tools

Licensing: Fixes a problem receiving new Community licenses via the Recast Portal after an existing license expires.

Endpoint Insights

Overall Software Update Status Dashboard: Adds previously missing results. (Customer-Reported Bug 14812)

Application Manager

Recast

Deployments:

- Fixes delays when deployments are scheduled to run 'As soon as possible' outside of the UTC+0 time zone. (Customer-Reported Bug 15045)
- Fixes an inability to add an application to a different deployment process after it is deleted from a deployment process that is running.

Applications:

- Adds the missing 'Warning' or 'Error' deployment process status when an application import fails.
- Fixes duplicate titling that appeared in the Application Availability and Application Deadline sections under Global Deployment Settings.
- Fixes an issue where a previous dependency version is incorrectly added to supersedences when a new application version has an older version as a dependency.
