

# Remove or Delete an Application from a Deployment Process

Last Modified on 03.26.25

On the **Applications** page, you can remove or delete an application. When you remove an application, the deployment process will no longer install newer versions of the application. If you remove the only application included in the deployment process, the deployment process itself will be deleted. Old versions of the application will remain in Configuration Manager.

## Remove an application from a deployment process

To remove a Recast Catalog application or a custom application from a deployment process, click the ellipsis ( ... ) to the right of an application and choose **Remove application from deployment processes**.

### Applications

Vendor	Application	Date Added	Deployment processes	Version to be Deployed	Actions
Microsoft	Microsoft Visual Studio 2022 Enterprise (Current)	3/26/2025	0	v17.13.35919.96	Deploy ...
Microsoft	Microsoft Visual Studio 2022 Professional (Current)	3/26/2025	0	v17.13.35919.96	Remove from deployment processes

**NOTE:** You can also remove an application from the [Deployment Processes](#) page.

## Delete a custom application

When you delete a custom application, it is removed from the Recast Management Server database and from any deployment processes. If you delete the only application included in the deployment process, the deployment process itself is deleted.

To delete a custom application, on the **My Catalog** tab, click the ellipsis ( ... ) to the right of a custom application and choose **Delete application**.

### Applications

Vendor	Application	Date Added	Deployment processes	Version to be Deployed	Actions
Recast	Agent	2/18/2025	0	v5.9.123	Deploy ...
