

# Recast Component and Product Requirements

Last Modified on 03.10.25

Before starting the [multi-product implementation workflow](#), ensure that your system meets the following [hardware](#), [software](#), [network](#), and [certificate requirements](#) for Recast Management Server, Right Click Tools, Application Manager, and Endpoint Insights.

## Hardware Requirements

The Recast Management Server hardware requirements listed in this document are meant to guide the setup of a simple Recast environment for all Recast Software products that connect to Recast Management Server.

These guidelines assume that all default settings are used, that the server has Internet access, and that your environment includes fewer than 20K Agents. For larger or more complex environments, refer to the [comprehensive list of RMS System Requirements](#).

Physical or virtual server sized as follows:

- 8-core CPU
- 28 GB RAM
- 2 GB of Disk Space on the C: drive

**NOTE:** Additional disk space required for the Recast Management Server database or for Application Manager does not need to be located on the C: drive.

## Software Requirements

Recast Management Server	<a href="#">Supported version of Microsoft Windows Server</a> (Windows Server 2022 recommended) Microsoft .NET Framework Version 8 <a href="#">Supported version of Microsoft SQL Server Standard</a> (SQL Server Standard 2022 recommended)
Right Click Tools Console Extension	<a href="#">Supported version of Microsoft Configuration Manager</a> <a href="#">Supported version of Windows 10 or later</a>

Application Manager	<a href="#">Supported version of Microsoft Configuration Manager</a>
Endpoint Insights	Supported version of SQL Server Reporting Services Power BI Report Server September 2022 version or later

## Network Requirements

### Inbound Network Traffic

The default network port for inbound network traffic to the Recast Management Server is TCP/444. If you change the port for the website, this firewall rule must be changed to match.

### External Domains

Recast Management Server and/or Recast Proxy require outbound access to the following external domains.

Recast license activation	<ul style="list-style-type: none"> <li>• <a href="https://activation.recastsoftware.com">https://activation.recastsoftware.com</a></li> </ul>
Endpoint Insights warranty information collection	Recast Management Server requires outbound access to the Warranty API at: <ul style="list-style-type: none"> <li>• <a href="https://warranty.recastsoftware.com">https://warranty.recastsoftware.com</a> (TCP/443)</li> </ul>
Application Manager Enterprise	Recast Management Server and Recast Proxy require outbound access to: <ul style="list-style-type: none"> <li>• <a href="https://amprod02.recastsoftware.com">https://amprod02.recastsoftware.com</a> (TCP/443) - to access the application catalog</li> <li>• <a href="https://amprodpub02.recastsoftware.com">https://amprodpub02.recastsoftware.com</a> (TCP/443) - to download application media and icons</li> </ul>
Application Manager Standard	Recast Management Server and Recast Proxy require outbound access to: <ul style="list-style-type: none"> <li>• <a href="https://amprod01.recastsoftware.com">https://amprod01.recastsoftware.com</a> (TCP/443) - to access the application catalog</li> <li>• <a href="https://amprodpub01.recastsoftware.com">https://amprodpub01.recastsoftware.com</a> (TCP/443) - to download application media and icons</li> </ul>
Application Manager Intune integrations only	Recast Proxy requires outbound access to: <ul style="list-style-type: none"> <li>• <a href="https://login.microsoftonline.com">https://login.microsoftonline.com</a> (TCP/443) - for Entra ID authentication</li> <li>• <a href="https://graph.microsoft.com">https://graph.microsoft.com</a> (TCP/443) - to connect to the Microsoft Graph REST API</li> </ul>

## Certificate Requirements

Recast Software strongly recommends using public certificates or Active Directory certificates (AD CS).

The certificate's subject name (or a subject alternative name) should match the server name in the URL to which Right

Click Tools and/or Recast Proxies are pointed.
