

# Exclude a Device From Application Group Deployment

Last Modified on 05.24.24

If you want to exclude specific device(s) from Application Group deployment, you need to create a separate Azure AD group for the devices to be excluded and add an exclude type deployment for it. Exclude deployment will exclude the installation of all applications that have been selected to the deployment process.

1. Create an application specific Azure AD group for devices that you want to exclude from other deployments of the selected application
2. Add **device** objects to the group
3. Navigate to **AM portal** -> **AM for Intune** -> **Administration** -> **Deployment processes** page
4. Find a deployment process where you have added Application Groups maintained group
5. Add the new Azure AD group to the deployment process and change its **Assignment mode** to **Exclude**
6. Click **Start deployment now** to create the exclude deployment into Intune

An example deployment process for WinSCP:

The screenshot shows the 'Deployment Processes' page in the Recast Software Application Manager. The 'Deployments' tab is selected, displaying a table of deployment processes. The table has columns for #, Tenant, Group, Intent, and Mode. The fourth row is highlighted in red, indicating a deployment process for 'demo.recastsoftware.com' with the group 'AM - Exclude WinSCP' and mode 'Exclude'.

#	Tenant	Group	Intent	Mode	
1	demo.recastsoftware.com	IT Global Pilot Devices	Required	Include	<a href="#">Delete</a>
2	demo.recastsoftware.com	All Users	Available	Include	<a href="#">Delete</a>
3	demo.recastsoftware.com	AM - WinSCP Required	Required	Include	<a href="#">Delete</a>
4	demo.recastsoftware.com	AM - Exclude WinSCP	Required	Exclude	<a href="#">Delete</a>

Simulated publish times if package was published now.

Time zone	Available	Deadline	Group	Tenant
UTC	5/24/2024 1:00 PM	5/24/2024 1:00 PM	IT Global Pilot Devices	
UTC	5/27/2024 1:00 PM	5/27/2024 1:00 PM	All Users	
UTC	5/27/2024 1:00 PM	5/27/2024 1:00 PM	AM - WinSCP Required	

- **IT Global Pilot Devices**
  - Required installation for pilot devices
- **All Users**
  - Makes the application visible in Company Portal for all end users

- **AM - WinSCP Required**
  - Required deployment for a group that's maintained by Application Groups feature
- **AM - Exclude WinSCP**
  - Devices in this group will be excluded from other deployments in this deployment process
