

Manage Route Scopes

Last Modified on 06.10.24

You can add, edit, or remove scopes applied to routes on the **Routes** page in your Recast Management Server.

Add or Edit a Route Scope

To add or edit a scope applied to an existing route:

1. On the **Routes** page, click the Edit icon to the right of the route.
2. In the Edit Route window that opens, enable the **Limit to devices** option.
3. Choose the set of devices included in the route's scope.
4. Click **Submit**.

Remove a Route Scope

To remove a route scope:

1. On the **Routes** page, click the Edit icon to the right of the route.
2. In the Edit Route window, disable the **Limit to devices** option.
3. Click **Submit**.
