

View & Manage Global Settings

Last Modified on 06.03.25

View Inherited Settings

You can view deployment processes that are inheriting a specific global setting.

To view inheritance for a setting:

1. On the **Application Manager > Settings** page, click the Settings cog to the right of the environment.

Settings

Environments

View and manage your Application Manager Settings for the Configuration Manager and Intune service connections in your environment.

Configuration	Environment ↑	Type	Deployment processes	Actions
✓ Ready	ConfigMgr-Environment	 Configuration Manager	3	 
⊘ Not Ready ⓘ	Intune-Environment	 Intune	0	 

2. On the **General**, **Deployment Processes** or **Deployments** tab, click the View Inheritance icon beside a heading or an individual setting.

Environment Settings

ConfigMgr-Environment |  Configuration Manager

General **Deployment Processes** Deployments

Basic Advanced [Reset all to default](#)

* Application Name Format ⓘ

Publisher ✕ Application ✕ Version ✕

✕  

e.g. Microsoft Office 365 1.022.1076

NOTE: You'll see a warning at the top of the tab if one or more settings has blocked inheritance.

3. In the **Inheritance** side panel that opens, view or search for the deployment processes that inherit the setting.

Inheritance

The following deployment processes are inheriting the **Application Name Format** setting.

2 deployment processes found
